A Home Orchard Will Feast YOUR Family

Home Orchard of G. B. Mays, Champaign Co., Ill. All Record-Bearing Strain Stark Trees. Last Year He Sold 47 bu. Of Cherries, 54 bu. Of Plums and 90 bu. Of Apples Besides All The Family Ate and Put Up For Winter Use. This Little Orchard-Vineyard Has Netted Him About \$700.00 Profit Per Year For Years.

You have enough spare ground in your Home Yard or Farm to set out one of the home orchards offered below of a few trees that will bear all the fruit from early to late each season that your family can eat—plenty to “put up” for the balance of the year—and, lots more that you can sell on a roadside stand or in nearby towns—often paying for the trees with the first crop.

As Prof. T. J. Talbert, Missouri State Horticulturist, stated in the **Kansas City Star** of March 23, “A Small

Orchard Will Prove An Asset To The Farm.”

Prof. Talbert goes on further to say: “Many think that the home orchard will require an undue amount of work. **This is not true for the home orchard of one acre or less.**

“The prospective home orchardist should keep in mind the **MAIN OBJECT OF THE HOME ORCHARD IS TO SUPPLY ENOUGH FRUIT FOR THE FAMILY.** With proper care and attention, no similar area on the farm will produce for the time and labor employ-

ed as great returns to the yearly food supply of the family as the home orchard.”

The “one crop” farming idea has been banished. All wise farmers know that they should raise some hogs, cattle, poultry and that they should plant other crops besides just corn or wheat. The basic idea of **RAISE MOST OF WHAT YOU EAT RIGHT ON YOUR OWN FARM** has again become the motto of shrewd farmers—for both health and economy. No farm is complete without a home orchard.
